

On the Subject of Colored Letters

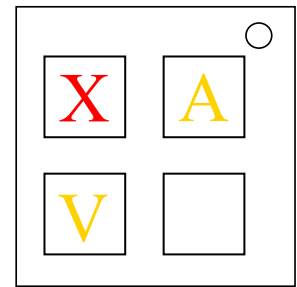

Multicolored multialphabet multibutton

Calculate the score of a set of letters on each button using the table. Each sequence is four to six letters.

The first letter of the sequence is the starting letter. The remaining letters are the subsequent letters.

There will be a pause before each starting letter begins.

Select the buttons with scores from largest to smallest. If there is a tie, you can select the buttons with tied scores in any order. Selecting an incorrect button will cause the module to strike and reset.

Colors:	Letters:	Starting Score:	Subsequent Scores:
Red	A	5	+3
Yellow		4	+1
Green		8	+6
Blue		3	+7
Red	B	3	+7
